

Autosoft Connect

Connect with partners you care about with safe, secure, and cost-effective integration.

With Autosoft Connect, you get complete flexibility to run your dealership your way with open, secure, and continuous access to leading third-party application providers.

- ✓ **Choice:** Choose from a wide range of providers to best meet your needs.
- ✓ **Security:** Gain peace of mind knowing only those providers that have been screened and meet stringent criteria have access to the data within your DMS.
- ✓ **Reliability:** Be confident that the interface between your DMS and your providers will work reliably—even after system updates.
- ✓ **Efficiency:** Reduce data entry errors and save time and money with a streamlined workflow that eliminates duplicate data entry.

Autosoft Connect Features:

Data Services

Autosoft sends your dealership data in a standardized format to a secure, password protected FTP site. The data often includes: Vehicle Sales, Service Repair Orders, Service Appointments, Vehicle Inventory, Parts Inventory, and Parts Sales. Autosoft also offers customized data feeds per third-party requests.

Manufacturer Communication/DCS

Autosoft enables seamless dealer communications with leading manufacturers to ensure that you can access the information you need to service and sell cars.

Certified Data Access

Autosoft's state-of-the-art, real-time, bidirectional integration hub connects you to your chosen partners with secure, deep, and comprehensive data sets.
