

OEM Integration Made Simple

Infiniti and Autosoft DMS

Infiniti has approved Autosoft's DMS for integration with Nissan North America's (NNA) Dealer Business System (DBS). **Improve operational efficiencies with significant time savings and error reductions.**

Infiniti

F&I/Sales Integrations

- » **Customer Information:** Provide NNA's DBS with updates to customer information maintained in your DMS. The interface sends notifications of changes to customer information when you add or edit that information.
- » **F&I Deals:** This utility transmits details of financing transactions from your DMS when you sell a new or used vehicle. NNA uses the data to automatically populate RDR records.

Accounting Integrations

- » **Financial Statements:** Autosoft DMS directly transmits your monthly financial statement to NNA's DBS. Financial statements received through this interface will be made available to the NNA Financial Statements application for your submission to NNA.
- » **Vehicle Inventory:** The Vehicle Inventory interface will provide NNA's DBS with information regarding changes to your dealership's inventory and feed vehicle information from NNA to your DMS to be processed as vehicle invoices.
- » **Vehicle Updates:** Autosoft DMS sends vehicle updates to NNA as you make changes to your inventory. The updates will be sent for both new and used inventory.

Parts Integrations

- » **DMS-Created Parts Order:** Transmit parts orders from your DMS directly to NNA's DBS, where they are stored and made available for further editing and submission to NNA Host.
- » **Parts Shipper:** NNA's DBS sends parts shipper information to your DMS to assist with reconciliation of parts orders by providing actual PDC shipment information.
- » **Parts Return:** Autosoft DMS transmits parts returns directly to NNA's DBS, where they are stored and made available for further editing and submission to NNA Host.
- » **ASR Interface:** NNA's DBS sends a daily parts order data interface to dealers that contains current Automatic Stock Replenishment (ASR) program parts order data for all active parts orders. The Parts ASR Stocking Guide contains the best reorder point (BRP), best stocking level (BSL), and control flags for all parts controlled by the ASR system. The interface also delivers quarterly ASR- suggested parts returns directly to your DMS.
- » **Parts Master:** Daily Parts Master updates containing either updates or a full Parts Master are pushed to your DMS to ensure you have the most current Parts Master information.
- » **Parts Activity:** Parts activity and stocking information from your DMS is sent to NNA on a daily and month-end basis to support the ASR program and parts locator network.
- » **Parts Invoices:** Autosoft DMS provides NNA with detailed daily information regarding all parts invoices you have created.

Service Integrations

- » **Service Appointments:** Service appointments will be transmitted from your DMS directly to NNA's DBS, where they will be available to the appropriate DBS applications.
- » **Vehicle Information Integration:** Outstanding service campaigns for a vehicle are identified when it arrives at your dealership for service.
- » **Warranty Credits:** A Warranty Credits file of warranty payments made to your dealership from NNA is available for processing in your DMS.
- » **Flat Rate Manual:** Automatic updates to the NNA-defined labor operation codes are downloaded and made available in your DMS.
- » **Repair Orders:** Automatic updates are sent to NNA whenever an RO is opened, modified, closed, or cancelled, allowing for creation of warranty claims and updates to the National Service History System. This data also drives the Infiniti-Nissan Early Detection System.
- » **NSH Repair Order, Customer Search and Information Retrieval:** View ROs completed by other dealers who have serviced a vehicle that your dealership is currently servicing for a comprehensive service history. Customer and vehicle lists can be pulled based on user-specified search criteria. NSH information (vehicle, customer, and RO history) for a specific VIN can also be pulled directly to your DMS.
